Welcome

Dear colleagues

The Sarnen Cardiovascular Course provides an excellent hands-on experience on uniquely realistic pulsatile models to perform all treatment procedures in acute type A aortic dissection. It is designed for junior cardiovascular surgeons at the beginning of their specialist training.

We look forward to personally welcome you to Lucerne/Sarnen!

Prof. Dr. Jürg Schmidli, Bern, Switzerland

Content of Workshop

Acute type A aortic dissection is a devastating pathology, and its treatment is challenging for both the patient and the surgeon. This cardiovascular course aims at improving comprehensive knowledge on acute type A dissection. This specific course is intended to cover the therapeutic approach and the whole range of surgical techniques in type A aortic dissection. The course enables training on life-like models with pulsatile flow. This unique course is designated for advanced cardiac surgery trainees and young consultants. Lucerne/Sarnen Workshops provide excellent hands-on experience on unique pulsatile realistic models.

Procedures that can be trained with the VI thoracic simulator:

- Comprehensive procedures for acute type A aortic dissection
- Cannulation techniques
- Hemi-arch aortic replacement
- Valve sparing root replacement (David / Yacoub procedure)
- Aortic root replacement (Bentall procedure with prosthetic/biologic composite graft, reimplantation of coronary arteries)
- Total arch replacement with branched graft and single Anastomosis
- Stepwise distal and proximal technique
- With/without elephant trunk technique (ET)
- With/without frozen elephant trunk technique (FET)
- Total arch debranching and ascending-supraaortic artery bypasses
